

MANAGED UNIFORM PROGRAMS

A smarter way to handle company uniforms - from sourcing to service.

Thinking About a Managed Uniform Program for Your Company?

**Uniforms aren't just apparel
— they're infrastructure.**

At Kevins Worldwide®, we design and manage uniform programs that support complex organizations with multiple locations, roles, and compliance requirements. Our approach combines strategic sourcing, inventory control, technology, and hands-on program management to deliver consistency, cost control, and operational efficiency.

We don't simply supply uniforms:

- We build systems that work — and we manage them for you.
- Enterprise-ready program structure
- Dedicated account teams
- 90-minute response time commitment
- Scalable solutions built around your organization

The Challenges of Traditional Uniform Programs

Many organizations start with good intentions but over time, uniform programs become fragmented and difficult to manage. Multiple vendors, inconsistent products, and manual ordering processes create inefficiencies that impact both cost and brand consistency.

Without a centralized strategy, uniform management turns into a reactive process.

Common pain points **we solve:**

- Decentralized ordering across departments or locations
- Inconsistent branding and product selection
- Manual tracking of inventory and spend
- Overstocking, stockouts, or unmanaged replenishment

Our **Strategic** Approach

We begin with discovery. Before recommending products or platforms, we evaluate your existing process, workforce structure, approval flows, and distribution model. From there, we design a program tailored to how your organization operates.

This ensures the solution fits your internal workflows – not the other way around.

Our strategic framework includes:

- Uniform policy alignment and role-based product planning
- Budget structure and approval workflow design
- Inventory forecasting and replenishment modeling
- Multi-location coordination and scalability planning

Program components include:

- Strategic sourcing and curated product selection
- Decoration services (embroidery, screen printing, DTF)
- Warehousing and inventory management
- Customized online uniform ordering platform
- Individual fulfillment to employees or bulk facility shipments
- Reporting and analytics for program oversight

Some of our uniform clients:

What's Included in a Managed Uniform Program

Our managed uniform programs are comprehensive – eliminating the need to coordinate multiple vendors or internal teams. We centralize sourcing, provide in-house decoration, and oversee inventory & distribution under one structured program.

The result is one cohesive system instead of scattered efforts.

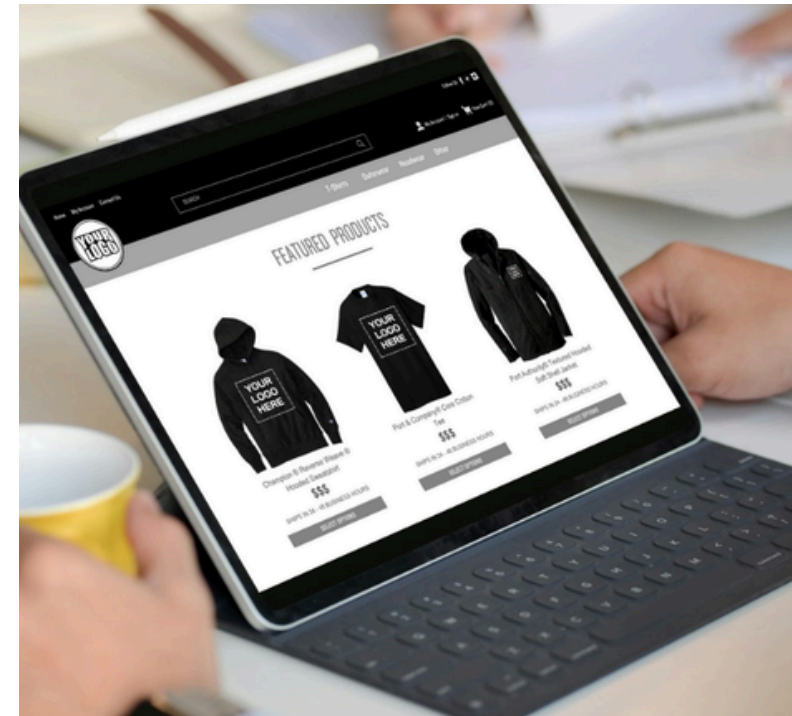

Technology That Supports Control

A successful uniform program requires more than product availability – it requires structure, visibility, and accountability.

Customize Needs

Each store is tailored to your brand standards, workforce roles, and internal approval processes.

Employees see only what's approved for their position, while leadership maintains clear oversight of budgets, ordering activity, and program compliance.

Behind the scenes, real-time inventory tracking and reporting provide the transparency needed to forecast demand, reduce waste, and prevent stock disruptions. The result is a uniform program that feels seamless to employees and strategic to leadership.

Operational & Financial Benefits

A managed uniform program doesn't just improve ordering – it improves efficiency across your organization. By centralizing procurement and introducing structure, companies gain measurable improvements in both cost control and time savings.

Uniforms become predictable, not reactive.

Benefits you can expect:

- Reduced administrative workload
- Improved brand consistency across all locations
- Lower waste through inventory forecasting
- Faster turnaround times
- Clear visibility into spend and program performance

Operational Efficiency at Scale

As your workforce grows or shifts across locations, your uniform program adapts without adding internal strain.

Data-Driven Cost Control

Clear reporting and usage visibility turn uniform spend into a measurable, manageable investment.

Ongoing Management & Support

Dedicated Account Management

You'll have a consistent point of contact who understands your program inside and out and proactively manages it on your behalf.

Strategic Reviews & Performance Insights

We regularly evaluate your program's performance, identify opportunities for improvement, and align with your evolving goals.

90-Minute Response Time Commitment

Our team responds quickly and reliably, ensuring your questions and requests never sit unresolved.

Inventory Monitoring & Reorder Recommendations

We actively track inventory levels and recommend replenishment before stock becomes an issue, preventing disruption across locations.

Our partnership doesn't end at launch. We actively manage your program, monitor inventory levels, recommend replenishment, and provide continuous support. We operate as an extension of your team – not just a supplier.

Let's Build a

SMARTER

Uniform Program

Uniform management should feel organized, predictable, and scalable — not reactive or chaotic. Kevins Worldwide® brings together product expertise, technology, and operational discipline to create uniform programs that work.

Let's evaluate your current process and design a program built around your organization's needs.
